

19th March 2025

Dear Parent/Carer,

Year 10 Science Assessments

I hope this letter finds you well. I am writing to inform you about the upcoming Year 10 Science assessments, which will take place during the week beginning 31st March 2025.

These assessments will be used to review students' current progress and support any necessary adjustments to their teaching groups. This process ensures that students are in the most appropriate sets for their learning needs. There will be another opportunity for reassessment in June.

Following these assessments, staff will be putting targeted intervention in place to help students make further progress. We encourage all students to take this opportunity seriously and prepare as thoroughly as possible. Here are the topics for revision in the upcoming assessments:

Biology – Infection & response and Photosynthesis including the structure of plants

Chemistry – Electrolysis & Quantitative Chemistry

Physics – Types of forces, Work done, Elasticity and Hooke's Law.

If you have any questions or would like further information on how to support your child, please do not hesitate to contact us.

Kind regards,

Sara Cox

Head Science Curriculum Lead
